DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by a Saft article. The document discloses a computer software for recommending a battery type having, *inter alia*, programming code for sifting through all the criteria based on the use of the device by a user and recommending the appropriate battery from a plurality of batteries.

Claim Rejections - 35 USC § 103

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over the Saft article in view of Chainer et al. (US 2005/0043978). Saft fails to disclose its battery-recommending program having an automated selection of the appropriate battery based on the actual usage of the device.

Chainer teaches an automated collection and dissemination of a product usage information. Logical parameters are automatically collected by a self-monitoring routine. Data relating to the product usage information is automatically disseminated to interested parties. It would have been obvious to have incorporated the program routine of Chainer into the program routine of Saft for the purpose of making the entire process automatic. This combination would result in a better, faster and more accurate recommendation of the appropriate batteries without having user's intervention.

Response to Arguments

Applicant's arguments filed 10/25/2005 have been fully considered but they are not persuasive. Applicant's argument that the Saft device does not recommend the battery type but merely provides a list of ranked batteries. The Examiner contends that Saft device does recommend the battery type by providing its ranked list of appropriate

batteries if there are any. The definition of "recommend" is within the reason of an ordinary skill in the art.

Granted the Saft device does not provide a use model in an automated setting. However the teachings of Chainer provides an automated system to provide these missing details so the user does not have to contend in the mundane process of selecting different variables to produce the correct battery for proper usage.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
